# Balance bicycle „Mini Sparite” instruction manual

## Dear customers!

"Mini Sparite"- our balance bike is qualitative and stable. "Mini Sparite" develops the leg muscles as well as different skills like a skill to keep balance and to coordinate the activities.

## Carefully read and remember

**\*Never leave child on balance bicycle without supervision.**

**\*Do not let the child ride on car drive lanes, close to water drains, stairs and other places dangerous to safety of children.**

**\*Carefully follow in hilly landscapes, because when riding from hill there is a possibility of speed increase not suitable for your child.**

## Safety requirements

Before putting a child on balance bicycle carefully read instruction manual!

Non-compliance with requirements of instructions can affect your safety and technical condition of the balance bicycle.

Your bicycle meets factory standards and is not designed for purposes which are not related to riding. Check the front wheel axle nuts before operation. The torque must be tight.

Handlebar and saddle tubes can be tightened by a clamp which is located on its base part. Carefully but tightly tighten the clamp in necessary height. Do not over-tighten the clamp.

Check if saddle and handlebar extension height is adjusted properly, they must not be higher than specified mark! Saddle and handlebar extension height is adjusted properly if sitting on balance bicycle both legs are completely straight and the ground can be touched only by tips of the toes.

## Balance bicycle maintenance

Regularly wipe off dirt from bicycle. Use cleaning agents when washing bicycle with water.

Timely lubricate bushings and chain.

Do not use lubricants from vegetable raw materials as it can create a harmful patina.

If necessary, balance bicycle maintenance can be done by manufacturer or other specialist.

## Guarantee liabilities

The guarantee comes in force on the day of purchase. Guarantee duration is 2 (two) years.

During guarantee, parts exchange and elimination of other defects are free of charge, if they have originated due to damaged parts or incorrect industrial assemblage.

The guarantee is void if damage originated because of incorrect use of balance bicycle i.e. if maintenance and usage conditions not met, if incorrect lubricants are used, if it has been used when incorrectly adjusted (insufficient insertion of saddle or handlebar tubes into carriage) or incorrectly mated, or the riding on road edges or other obstacles have been done. The guarantee is void in case of natural wearing of parts (e.g. tyres, bushings), if the balance bicycle has been overloaded, if there has been an accident, if it has been misused or if the bicycle has been used for other purposes (amateur balance bicycle used in extreme traces or in competitions).

Guarantee repairs are made when customer presents purchase receipt and balance bicycle passport received when purchased.
